

Gayathri Ramar

Senior QA Automation Engineer | Playwright & AI Testing Expert

rgayathri0207@gmail.com [8220177757](tel:8220177757) [linkedin.com/in/rgayathri0207](https://www.linkedin.com/in/rgayathri0207) github.com/rgayathri0207 [Chengalpattu, TN](#)

Results-driven **QA Automation Engineer** with **~9 years of experience** across **Automobile, Healthcare, and Finance** domains. Expert in **Playwright, Selenium WebDriver, Cypress, and Robot Framework**, with strong skills in **UI, API, regression, and end-to-end testing**. Proficient in **test strategy, automation framework design, CI/CD integration, and defect management**. Strong **team mentor** with experience in **Agile/Scrum** environments. Leveraging **GitHub Copilot** to enhance **automation efficiency** and accelerating delivery.

SKILLS

Playwright Selenium WebDriver Cypress Robot Framework Java JavaScript TypeScript TestNG
Cucumber (BDD) POM SpecKit TDD Keyword-Driven Bruno Postman REST API Testing
JDBC Database Testing CI/CD Jenkins Git Maven Gradle Agile/Scrum SDLC/STLC
Test Strategy Manual Testing GitHub Copilot Playwright MCP/CLI JIRA

EXPERIENCE

Senior QA Automation Engineer

Dec 2022 - Present

Renault Nissan Technology and Business Centre

Chennai

- Leading **QA delivery across 9 projects (Physical Testing domain)**, managing a team of **6 QA engineers**
- Driving **test strategy, automation frameworks, and quality engineering practices**
- Improved **test coverage across projects** through **framework standardization**
- Built **Playwright automation framework from scratch**; automated **250+ UI/E2E test cases** with **scalable regression suite**
- Reduced **regression execution time by 50%** through **Playwright automation**
- Implementing **Spec-driven (BDD) automation** using **Playwright CLI, SpecKit, MCP**
- Migrated **300+ Protractor scripts to Cypress**, improving **performance and maintainability**
- Enforcing **automation standards, CI/CD integration, and QA best practices**
- Using **GitHub Copilot** for **AI-assisted automation and productivity improvement**
- Working in **Agile/Scrum teams**, supporting **continuous testing and defect management**

Automation Engineer

Apr 2019 - Mar 2022

Cognizant Technologies

Chennai

- Developed and maintained **test automation scripts** using **Core Java, Selenium WebDriver, and JDBC** in the **Insurance domain**
- Built **database automation solutions** using **JDBC**, validating **backend data** and improving **test coverage**
- Contributed to **automation framework enhancements** and supported **build deployments**
- Participated in **Agile/Scrum ceremonies** and collaborated with **cross-functional teams**
- Represented QA in **client status calls**, providing updates on **testing progress and quality metrics**

Test Automation Engineer

Dec 2016 - Mar 2019

DXC Technology

Chennai

- Designed and executed **manual and automated test cases** for **functional testing** in the **Healthcare domain**
- Developed **Selenium WebDriver automation scripts** using **Java** for **UI and regression testing**
- Performed **smoke, sanity, regression, and functional testing** to ensure **application quality**
- Collaborated with developers for **defect tracking, debugging, and closure**
- Conducted **Selenium automation training sessions**, enabling **team skill enhancement**

PROJECTS

POLL-IS / COP-IS

Renault Nissan Technology & Business Centre

Tech Stack: Playwright, JavaScript, CI/CD

- Developed **QA solutions** for **pollution testing and compliance systems**, validating **vehicle emission results** against **regulatory standards**
- Ensured **Conformity of Production (COP)** across multiple testing stages through robust **test automation and validation frameworks**
- Worked on **end-to-end testing, data validation, and quality assurance** for critical **automotive systems**

TIAA (Teachers Insurance and Annuity Association)

Cognizant

Tech Stack: Selenium, Java, JDBC

- Contributed to testing of **insurance and financial services platform** providing policies and benefits for **educators and professors**
- Built **automation scripts** using **Selenium WebDriver, Core Java, and JDBC** for **UI and database validation**
- Ensured **data integrity, functional accuracy, and backend validation** in **insurance workflows**

LORENZO (LCM)

DXC Technology

Tech Stack: Selenium, Java

- Worked on **Healthcare management system** handling **patient data** using **NHS (National Health Service) numbers**
- Focused on **maternity module**, covering **pregnancy, postnatal, and neonatal care workflows**
- Performed **functional testing and Selenium-based automation**, ensuring **accuracy, compliance, and system reliability**

EDUCATION

Bachelor of Engineering - E&I (CGPA: 8.06)

Jeppiaar Engineering College

2016

Chennai, India

KEY STRENGTHS

- Proven **leadership** in QA delivery.
- Strong **multi-framework automation expertise**.
- Skilled in **Agile collaboration & communication**.
- Ability to integrate **AI tools** for enhanced testing efficiency.
